## Оценочные материалы и средства для проверки сформированности компетенций

### Модуль 1. Бытовая сфера общения (Я и моя семья).

#### Тема 1. «Знакомство». «О себе»

##### 1. Устный опрос по теме.

###### 1.1 Вопросы для устного опроса по теме:

1. What is your name?
2. Where are you from?
3. Where do you live in Kostroma?
4. What is your appearance? How do you look like?
5. At what school did you learn?
6. How successful in studies were you?
7. At what faculty do you study at the academy?
8. Why did you take the decision to take this faculty?
9. Did anybody influence your decision?
10. What kind of person are you? What could you say about your character?
11. What are your hobbies and interests?
12. What are your plans for the future?

##### 3. Презентация подготовленного монолога.

###### Примерное содержание монологического высказывания:

№1 My name is Kostya. My surname is Laznev. I was born in Moscow on the 23rd of June in 1981. I am a tall, thin boy. My hair is dark and short. My face is oval, my nose is straight. My eyes are large and brown. My friends say that I am a good-looking boy. I like to dress well. I usually wear black trousers, light shirts, clean boots. I had a dream to enter the Institute that's why I worked hard at school. We studied many subjects such as History, Russian, Physics,

Geography and others. I was fond of English and Physics. And I was good at them. I want to get a good education and find an interesting and useful work. I think that I am honest, serious and polite. I have a hobby. I like to sing songs. My father likes singing too. He knows many good songs and we usually sing songs together. Nowadays young people don't like classical music. They prefer pop music. My parents invite me to some very good concerts of classical music. It is great. I am very grateful to my parents because now I begin to understand how wrong I was going only to pop concerts. I am proud of my mother and father. They are musicians. We like to spend our free time together. We often go to the museums, to the Concert Halls, to the theatres. I want to say that I respect my parents.

№2 My name is Natalia. My surname is Govorova. I am 15. I was born in 1982 in Chelyabinsk. I live in a small town of Usinsk in the Komi Republic. My address is Flat 116, 19, Pionerskaya Street. My phone number is 41-5-81. I am a student. I study at university. I do well in all subjects. They say, that I am a hardworking person. To tell the truth, all subjects come easy for me but sometimes I have to sit much, for example, to do assignments in Physics or Chemistry. My favourite subject is English. I spend much time on it reading books, doing tests etc. I'm sure, English is essential for my future career. I like reading. I think comics and detective stories are much easier to read but I prefer to read novels - historical or up-to-date. I like music. My musical tastes are different, but it depends on my mood. But I think every apple is good in its season. I play the piano and the guitar, not seriously, but for my soul. Sometimes I like to listen to the Russian classical music. My favourite composers are Chaikovsky and Mozart. I don't like rock music, but I also like Russian folk songs. I have not much time to watch TV but sometimes I spend an hour or two watching an interesting film or a news program. In the evening I often read newspapers (our local ones) or magazines. I like fresh air and exercise. I'm sorry I have not much time for doing sports. But some aerobics in the morning, a swimming-pool twice a week, a ski-walk on a frosty day are of great help. Sport is fun. I have a wide circle of interests. I'm very sociable. I have many friends; most of them are my class-mates. We spend much time together, going out to the cinema or to the disco party, speaking about lessons and music, discussing our problems. But most of all I like my family. We all are great friends and deeply attached to each other. You see, it's me - a person with his good and not good characteristics, liking this and hating that. But it's interesting for me to live, to open new things.

#### **4. Вводно-обзорный курс грамматики**

##### **4.1. Контрольная работа.**

**Часть 1:** Порядок слов в повествовательном предложении; Безличное предложение; Местоимения; Глаголы «to be», «to have»; Оборот «There +to be»; Существительное в функции определения.

##### **Контрольная работа**

###### **Variant I**

##### **1. Выберите правильную форму глагола *to be* или глагола *to have*:**

1. I ... a first year student.
2. He ... at the theatre yesterday.
3. Tomorrow they ... 3 pairs.
4. My friend ... a lot of work.

##### **2. Поставьте следующие существительные во множественное число:**

Story, match, grass, life, shelf, man, man-driver, bush, tooth, child, deer, play.

##### **3. Перепаразируйте следующие словосочетания, употребляя притяжательный падеж существительных, переведите на русский язык:**

1. The handbags of these women. 2. The books of my friends. 3. The flat of his sister.

##### **4. С какими местоимениями соотносятся данные формы глаголов, определите их время:**

1. have            2. will have            3. was            4. had            5. are

**5. Заполните пропуски личными местоимениями:**

1. ... come into their classroom and sit down at the desks. 2. ... have our English class in the morning. 3. Where is my book? ... is on the shelf. 4. ... were absent yesterday.

**6. Вместо существительных поставьте личные местоимения:**

1. *Students* were on the farm last year. 2. *Nick* is always late for the classes. 3. *My brother* will be at the concert in the evening. 4. *The car* is in the garage.

**7. Поставьте местоимения в объектном падеже:**

1. Tell ( they ) the truth. 2. They always help ( I ). 3. He gives ( we ) his textbook. 4. Ann reads the text in English. She reads ( it ) well. 5. Let ( I ) help ( you ). 6. Invite ( she ) for the party.

**8. Заполните пропуски притяжательными местоимениями:**

1. I am a doctor. ... surname is Petrov. 2. Ted is a schoolboy. ... marks are good. 3. These are students. This is ... classroom. 4. Do you like ... work? 5. Ann takes ... pen.

**9. Вставьте артикль, где необходимо:**

1. Come to ... blackboard and write ... exercise 5. 2. He is still ... young man and we hope he will become ... good pianist. 3. I like jam on ... piece of ... bread. 4. This is ... new journal. ... journal is on ... economics. 5. ... Urals separate ... Europe from ... Asia. 6. What is ... capital of ... Spain. 7. ... London is on ... Thames. 8. He goes to ... United Kingdom every ... month.

## **Тема 2. «Семья», «Семейные традиции».**

### **1. Устный опрос по теме.**

*1.1 Вопросы для устного опроса по теме:*

1. How large is your family?

2. What are the members of your family?
3. Are there any things that you do with your parents together?
4. Have you got any family traditions?
5. What is your favorite family tradition?
6. What is the most unusual tradition in your family?
7. What can you advise people who want to get on well with their parents?
8. Do you often spend your free time with your parents?
9. What will you ask your British friend about his/her family traditions?
10. Do you live in a flat or in a house of your own?
11. What are the rooms in your dwelling?
12. Have you a room of your own?
13. What are food preferences in your family?
14. Is it exclusively your mother who cooks in your family?
15. Do you often eat out?
16. Does your family spend time travelling?
17. Have your family ever gone on travels?
18. Why is your family important for you?

## **2. Презентация подготовленного монолога**

### **Тематика монологических презентаций:**

1. Взаимоотношения в семье. Семейные обязанности.
2. Устройство городской квартиры/загородного дома.
3. Семейные праздники. Досуг в будние и выходные дни.
4. Семейные путешествия.
5. Предпочтения в еде. Еда дома и вне дома.

### **Примерное содержание для построения монологов:**

Family is very important for every person, because it gives you a sense of stability and tradition, a feeling of having support and understanding. You feel secure when there's a family behind you. They are people you can trust and rely on, people who won't let you down and who share your joys and sorrows. In happy families parents are frank and honest with their children, they treat their children with respect without moralizing or bossing them, and children in their turn learn how to treat other people and how to form relationship with their peers.

I enjoy the honest and open relationship in my family. I like it when parents trust their children, give them enough freedom and respect them. I think these things make family relations warm and pleasant. There is no so-called "generation gap" in our family, though we may argue and disagree on certain issues. I can always bring my friend home and my parents are very positive about it, although they don't always approve of our tastes, views and clothes.

I guess, when people spend more time together they are closer to each other.

We have some family traditions. But to my mind we haven't got anything special or original in our family. All our family traditions are connected with some holidays. Apart from national holidays there are family holidays like birthdays, weddings and anniversaries. A birthday is always a happy event in our family. On these days we usually have a party. Friends and relatives come with flowers and gifts and a festive dinner is served with plenty of delicious food to eat. Afterwards the guests either dance or sing, listen to music or just chat. One more family tradition is spending summer holidays together either at the seaside or in the country, which I enjoy very much. I'd like to become more independent from my parents in future, nevertheless we'll always be the best friends because my parents are the most important people in the world.

My parents are the most important people in the world. You know, my parents and I are usually very busy during the weekdays and we seldom have a chance to spend time together. Sunday is the day when we can sit at a table and talk over everything that happened during the week. Eating together makes us feel close and we often have our most useful conversations at these times. Almost every weekend we visit our grandparents, sometimes we visit my uncle (aunt) and his family.

Also once a week my parents give the flat a big clean. Of course I help them with it. By the way it's not so boring. I turn on music and we even have fun. Then we may go shopping together. I like to go shopping with my parents because they always buy me something. During our shopping rounds we discuss a lot of things and make plans for the next weekend.

My favourite tradition is to celebrate the New Year. It's a special holiday with its charm and surprises. We give presents to each other, go for a walk together, visit our grandparents and family friends.

I think we are old enough to realize that adults are not saints and may make mistakes and that the so-called generation gap should not spoil our relations. Good children are prepared to compromise and meet their parents halfway, render any possible help to their parents, treat their parents in the way they would like to be treated themselves.

So first of all I can advise for anyone to try to understand the feelings of your parents and show respect to them. Even if you don't agree with their thinking, try to make them understand politely, don't use harsh words with them which may hurt. It's important to celebrate your parents' and grandparents' birthdays. It will make them realize that you care for them.

To tell you the truth, I don't often spend time together with my family on weekdays. But on Sunday we try to organize something to have time for each other. We visit our grandparents and friends, go shopping, go for a walk or just eat out.

In summer we often go somewhere together to the seaside or to the country. I like such holidays because usually we have a lot of fun.

### **3. Вводно-обзорный курс грамматики**

Часть 2. Модальные глаголы и их эквиваленты»

*3.1. Контрольная работа.*

**Variant I**

**Задание 1 Переведите на русский язык:**

1. This plant is to be put into operation next year.
2. They have to get up at 6 o'clock as their working day begins at 8.
3. Nobody could answer the question.
4. Soon we shall be able to understand many phenomena.
5. The laboratory assistant had to check up the equipment several times.
6. Energy is never destroyed: one form of energy may be converted into another.
7. The experiments must be carried out at room temperature.
8. We are not allowed to use dictionaries during exams.
9. She should follow her mother's advice.
10. Children ought to help their parents.

**Задание 2. Вставьте соответствующие модальные глаголы:**

1. I ... not go to the theatre with them last night, I ... revise the grammar rules and the words for the test.
2. My friend lives a long way from his office and ... get up early.
3. All of us ... be in time for classes.
4. When my friend has his English, he ... stay at the office after work. He (not) ... stay at the office on Tuesday, Thursday and Saturday and ... get home early.

(1.2.3) Чтение с нахождением интересующей или нужной информации (просмотровое)

#### Образцы дополнительных текстов:

##### Задания на понимание основного содержания незнакомого текста:

(чтение незнакомого оригинального чтения с целью извлечения информации).

№1 **The public educational system in Russia** includes pre-schools, general schools, specialized secondary and higher education. So-called pre-schools are kindergartens in fact. Children there learn reading, writing and maths. But pre-school education isn't compulsory - children can get it at home. Compulsory education is for children from 6(7) to 17 years of age. The main branch in the system of education is the general schools which prepare the younger generation for life and work. There are various types of schools: general secondary schools, schools specializing in a certain subject, high schools, gymnasia and so on. The term of study in a general secondary

school is 11 years and consists of primary, middle and upper stages. At the middle stage of a secondary school children learn the basic laws of nature and society at the lessons of history, algebra, literature, physics and many others. After 9th form pupils have to sit for examinations. Also they have a choice between entering the 10th grade of a general secondary school or going to professional school. Pupils who finish the general secondary school, receive a secondary education certificate, giving them the right to enter any higher educational establishment. One has to study in the institute for 5 years. Higher educational institutions train students in one or several specializations.

**№2 Education in Britain** developed by steps. The first step was the introducing of two kinds of school: grammar schools and secondary modern schools. Grammar schools offered a predominantly academic education and in secondary modern schools education was more practical. The second step was the introducing of a new type of school, the comprehensive, a combination of grammar and secondary modern, so that all children could be continually assessed and given appropriate teaching. These schools were co-educational and offered both academic and practical subjects. However, they lost the excellence of the old grammar schools. Then after 1979 the greatest reforms in schooling were introduced. They included the introduction of a National Curriculum making certain subjects, most notably science and one modern language, compulsory up to the age of 16. The National Curriculum aims to ensure that all children study essential subjects and have a better all-round education. Pupils' progress in subjects in National Curriculum is measured by written and practical tests. More ambitious pupils continue with very specialized studies in the sixth form. They remain at school for two years more. Pupils sit for exams leaving secondary school and sixth form. They sit for the General Certificate Secondary Education at the end of the 5th-years' course. A-level or AS-levels are taken after two years of study in the sixth form. They are the main standard for entrance to university or other higher education. Some parents prefer to pay for their children to be educated at independent schools. This private sector includes the so-called public schools, some of whose names are known all over the world, for example Eton. It provides exceptionally fine teaching facilities, for example in science, languages, computing and design. Its students are largely from aristocratic and upper-class families. The Government's vision for the education system of the 21st century is that it will neither be divisive nor based on some lowest denominator. Diversity, choice and excellence will be its hallmarks in this century.

**№3 After taking GCSE (General Certificate of Education) exam young people can take three ways:**

1. They can continue their academic education in the sixth form & get GCE-A Level (General Certificate of Education Advanced level) and then enter the university they have chosen (The most popular way in Britain)
2. They can continue studying in a college, where they choose any practical course and get a diploma NVA (National Vocation Qualification) or S VA in Scotland. After that they can start working.
3. Mixed type education. Young people can get General National Vocation Qualification (GNVQ) or GSVA in Scotland and then they can start practical work or enter a university as well.

After that the education is considered to be higher. To get higher education young people go to the institute or college & after 3-4 years of studying they'll get Bachelor-degree and if they study 1-2 years more – Master degree.

### **3. Вводно-обзорный курс грамматики.**

**(Часть 3)** Степени сравнения прилагательных и наречий. Союзы сравнения, сравнительные обороты.

*3.1. Контрольная работа.*

**Степени сравнения. Сравнительные обороты.**

**VARIANT I**

**1. Переведите предложения:**

**I.**

1. He thought he was the happiest man in the world.
2. The new car is more comfortable than the previous one.
3. His radio set is not so powerful as mine.
4. Yesterday was hotter than any other day we had this summer.
5. Last year he spent less time on English than this year.
6. The sooner they finish the construction of the plant the better.
7. These farms are as large as those we saw yesterday.

**II.**

1. The trouble is that the student doesn't work properly at his English.
2. The commission will consider this offer carefully before accepting it.
3. In spite of the fact the report was short, it covered the subject.

**2. Употребите прилагательное в нужной степени сравнения:**

1. It is (cheap) to go by train than by airliner.
2. Are oranges (expensive) than bananas?
3. Where is the (near) bank?
4. It is the (unusual) thing I have ever done.
5. These shoes are not so (beautiful) as those ones.

**3. Образуйте степени сравнения от прилагательных, переведите на русский язык:**

big; heavy; large; clever; little; old; dangerous; bad.

**4. Переведите на английский язык:**

1. Я такой же высокий как мой старший брат.
2. Страусы (ostriches) бегают быстрее, чем собаки.
3. Волга – одна из самых длинных рек в России.
4. Твои друзья довольно молоды.

**3.2. ТЕСТ (1 вариант ответа)**

*Выберите правильный вариант:*

#### **Тема 4. «Студенческая жизнь» «Моя академия»**

##### **1. Опрос по базовым текстам раздела по аспектам:**

- (1) фонетическое чтение;

- (2) устный перевод со словарем;
- (3) письменный перевод со словарем;
- (4) чтение текста по тем на извлечение информации;
- (5) опрос по теме.

(1.1.5) Вопросы для опроса по текстам:

1. Do you agree that progress in the world depends upon progress in education?
2. What trend in education has taken place in the world since the 1980-s?
3. Why do young people want to obtain prestigious diplomas?
4. How is teaching arranged in British universities?
5. How do academic courses and conditions in student life in Britain differ from those in Russia?
6. What facilities for studies, dwelling, sport, recreation and entertainment do universities and colleges in Great Britain offer? In Russia?
7. What facilities does the academy offer?
8. Why is the academy attractive for many young people?
9. What are the opportunities for students to achieve high results in studies?
10. What could be done to improve the level of education in the academy?
11. How is social life of students arranged?
12. What traditions are popular among students in Britain? In Russia?
13. What events are you involved in?
14. What are you majoring in?
15. What are the main subjects in your major?

## **2. Индивидуальные задания (письменное оформление сообщения «Студенческая жизнь»)**

**Темы для сочинений:**

1. Students' life in Kostroma universities and colleges.
2. Students' life in the academy.
3. My working day.
4. All aspects of my student's life.

## **3. Монолог: в рамках проекта «ПРЕЗЕНТАЦИЯ АКАДЕМИИ»**

**Темы:**

1. История.
2. Факультеты и учебные курсы. Учебный план. Преподаватели.
3. Аудитории и лаборатории.
4. Социально-общественная жизнь и культурно-массовые мероприятия.
5. Спортивные достижения.

## **4. Вводно-обзорный курс грамматики (Часть 4)**

### **ВИДОВРЕМЕННЫЕ ФОРМЫ АНГЛИЙСКОГО ГЛАГОЛА**

#### **1. Времена группы «Indefinite Active & Passive»**

#### **2. Времена группы «Continuous Active & Passive»**

#### **3. Времена группы «Perfect Active & Passive»**

#### **4.1. Контрольная работа.**

### **Variant I**

#### **1. Определите время, тип, залог глаголов:**

- |                    |                |                    |              |
|--------------------|----------------|--------------------|--------------|
| 1. will be burning | 2. burns       | 3. will burn       | 4. are burnt |
| 5. is burning      | 6. burnt       | 7. was being burnt | 8. will burn |
| 9. burn            | 10. were burnt | 11. will be burnt. |              |

#### **2. Перепишите предложения, выделите сказуемые, определите их время и залог.**

#### **Переведите предложения на русский язык:**

1. He visited many lands and met a lot of people.

2. Some animals store food for winter.
3. They will work in a close contact.
4. The new substance was produced after many years of hard work.
5. We have finished our work today.
6. The plan will be carried out by the end of the week.
7. They are still discussing this problem.
8. Those pencil marks were made for you.
9. This book contains the information you need.
10. The chemical and physical properties of the substance are being investigated now.

**3. Вставьте глаголы в нужном времени и залоге:**

1. The books (to take) from the library yesterday.
2. The teacher usually (to ask) the students a lot of questions.
3. The rector (to visit) Academy's hostels next week.
4. The experiments (to complete) by the end of the month.
5. At the last lesson we (to train) how to use the new equipment.
6. Now a new railway (to build) between the two cities.
7. When I entered, the parents (to discuss) some problem.
8. We (not to meet) today yet.
9. My friends (to have) a nice week end a week ago.
10. You (to be) there in 10 minutes.

4.2. ТЕСТ (один вариант ответа)

**Variant I**

*Выберите правильную форму глагола:*

**We \_\_\_\_\_ breakfast when my aunt \_\_\_\_\_ to ask a phone number.**

+were having / called

had / called

were having / was calling

had / was calling

*Выберите правильную форму глагола:*

**I \_\_\_\_\_ TV at eight o'clock yesterday evening.**

+was watching

watched

am watching

have watched

*Выберите правильную форму глагола (Present Simple or Present Continuous):*

*to sing:*

**Polly has a brilliant voice. She...wonderfully.**

+sings

is singing

**Can you hear that? Somebody...a song!**

sings

+is singing

*Выберите правильную форму глагола "to have":*

**Mr. Smith stayed at his office very late because he ... a lot of work.**

has

have

will have

+had

**Укажите предложение, в котором глагол "to have" является вспомогательным:**

We shall have a party tomorrow.

+We have invited our friends.

We'll have to prepare for the party.

I hope we'll have a good time.

**Укажите, в каком предложении глагол стоит в Present Perfect:**

+She has bought a new pair of shoes.

She has a lot of different shoes at home.

She had bought a pair of new shoes for yesterday's party.

She had new shoes on at the party.

*Сопоставьте английские предложения с русскими:*

**She has typed the letter.**

+Она напечатала письмо.

Она печатала письмо.

Она печатает письмо.

*Выберите правильную форму глагола:*

**"... Fred this week?" "Yes, I saw it on Wednesday."**

Had you seen

+Have you seen

Will you have seen

You have seen

## Тема 5. Человек в современном мире

### 1. Опрос.

- (1) фонетическое чтение;
- (2) устный перевод со словарем;
- (3) письменный перевод со словарем;
- (4) чтение текста по тематике на извлечение информации

#### Подборка текстов по темам:

- Роль иностранного языка в современном мире.
- Современные языки международного общения.
- Образ жизни современного человека в России и за рубежом. Облик города/деревни в различных странах мира. Типы жилищ, досуг и работа людей в городе и деревне.
- Основы здорового образа жизни. Спорт и фитнес. История Олимпийских и параолимпийских игр.
- Плюсы и минусы глобализации.
- Проблема личной ответственности за сохранение окружающей среды.

### 2. Диалог (обсуждение тем раздела)

### 3. Монолог (сообщение по одной из тем раздела)

## 4. Грамматика: PARTICIPLE I;II

### 4.1. КОНТРОЛЬНАЯ РАБОТА:

№ 1

#### Variant I

#### 1. Переведите предложения, обращая внимание на категорию причастия:

1. We have translated the text.
2. Climbing the mountain he broke his leg.
3. The working engine was too noisy.
4. The discovery made was very important.
5. Roman towns surrounded by walls for defense were real military camps.
6. The students are working in the field now.
7. If changed the article will be published.
8. We often speak about our friends living in the south.
9. The fuel is ignited inside the cylinder.

#### 2. Переведите предложения, предварительно определив функции причастий:

1. He heard the voices coming through the open window.
2. Waiting for him I looked through the magazines lying on the table.
3. The explanation given was not complete.

4. The new materials recommended for bridge construction were described in the article written by our professor.
5. When burnt coal produces heat.
6. The growing plants should be well watered.
7. It is getting dark.
8. The bridge has been built this month

**3. Выберите из скобок требующуюся форму причастия.**

1. I think that the boy (standing, stood) there is his brother.
2. We listened to the girls (singing, sung) Russian folk songs.
3. When we came nearer, we saw two boys (coming, come) towards us.
4. Here is the letter (receiving, received) by me yesterday.
5. "How do you like the film?" he asked, (turning, turned) towards me.
6. She was reading the book (buying, bought) the day before.
7. Name some places (visiting, visited) by you last year.
8. Read the (translating, translated) sentences once more.
9. Translate the words (writing, written) on the blackboard.
10. We could not see the sun (covering, covered) by dark clouds.
11. The (losing, lost) book was found at last.
12. I shall show you a picture (painting, painted) by Hogarth.

*№2*

**Variant I**

**Task 1. Найдите Причастие, определите его форму (PI//PII) и функцию; переведите предложения на русский язык:**

From : Sue Mullins

(2) \_\_\_\_\_ : Seminar for the new staff

(3) \_\_\_\_\_

About the seminar you're organising for the new staff next month – will you need any equipment set up? I'll do a short introduction to the subject but I only need an OHP.

Can you fill in the request form for everything we'll need and send it to Shane Bell in the Technical department?

Thanks,

(4) \_\_\_\_\_

**Темы 6 – 8**

**Тесты (Обзор пройденной грамматики)**

**ТЕСТ № 1 (один вариант ответа)**

**Variant I**

*Выберите правильный вариант:*

**We \_\_\_\_\_ breakfast when my aunt \_\_\_\_\_ to ask a phone number.**

+were having / called  
had / called  
were having / was calling  
had / was calling

*Выберите правильную форму глагола:*

**I \_\_\_\_\_ TV at eight o'clock yesterday evening.**

+was watching  
watched  
am watching

*Выберите правильную форму глагола (Present Simple or Present Continuous):*

*to sing:*

**Polly has a brilliant voice. She...wonderfully.**

+sings  
is singing

**Can you hear that? Somebody...a song!**

sings  
+is singing

*Выберите правильную форму глагола "to have":*

**Mr. Smith stayed at his office very late because he ... a lot of work.**

has  
have  
will have  
+had

**5. Укажите предложение, в котором глагол "to have" является вспомогательным:**

We shall have a party tomorrow  
+We have invited our friends  
We'll have to prepare for the party  
I hope we'll have a good time

**6. Укажите, в каком предложении глагол стоит в Present Perfect:**

+She has bought a new pair of shoes  
She has a lot of different shoes at home  
She had bought a pair of new shoes for yesterday's party  
She had new shoes on at the party

*Сопоставьте английское предложение с русскими:*

**She has typed the letter.**

+Она напечатала письмо  
Она печатала письмо  
Она печатает письмо

*Выберите правильную форму глагола:*

**"... Fred this week?" "Yes, I saw it on Wednesday."**

Had you seen

+Have you seen

Will you have seen

You have seen

*Выберите правильный предлог:*

**Have you lived in this town \_\_\_\_\_ your childhood?**

+Since

for

from

*Present Perfect or Past Simple?*

**I (work) in the bank for three years. I like it very much.**

worked

has worked

+have worked

have been worked

*Выберите правильную форму глагола:*

**The shop ... at 6 in the morning yesterday.**

is opened

+was opened

will be opened

*Выберите правильную форму глагола:*

**The homework ... before the film began.**

was done

will have been done

have being done

+had been done

*Выберите правильную форму глагола:*

**These plants ... on this farm last year.**

have been grown

+were grown

will have been grown

are being grown

*Выберите правильную форму глагола:*

**The report ... when I came.**

was making

+was being made

was made  
were being made

*Выберите правильный вариант.*

**When Mark arrived, the Johnsons \_\_\_\_\_ dinner, but stopped in order to talk to him.**

#### 1. ОПРОС:

*Примерное содержание устного высказывания при опросе:*

#### CROP PRODUCTION

Crops are plants which have been carefully selected and developed by man. They produce food for people and animals. In all countries of the world crop production has been and will always be an important branch of economy.

There are different practices of crop cultivation on farms, and it depends on many factors in what way the crop should be grown and harvested. But the aim is always the same: to produce high yields of farm crops as economically as possible. This is of great importance nowadays, as the world population is constantly growing at a rapid rate<sup>2</sup>. Agriculturists of all countries must solve the problem how to provide the increasing supplies of high quality food for people.

Food production can be raised in two ways: either by cultivation of new lands or by the increase in yields on the same agricultural area. In traditional agriculture the first way was more popular. Nowadays yield increases are mostly obtained by introduction of new and improved varieties, by better use of fertilizers, better control of pests and diseases, chemical weed control. Yields may also be increased by application of unproved cultural practices, irrigation and drainage, by rapid improvements in mechanization of such operations as seedbed preparation, planting, harvesting, and storage. In some cases a combination of these factors is necessary.

These methods of yield increases have been developed both from the achievements of natural and biological sciences and from practical experience and experiments.

#### 2. ИНДИВИДУАЛЬНОЕ ДОМАШНЕЕ ЗАДАНИЕ:

##### 2.1 Устный перевод со словарем (подготовленного текста)

Примерное содержание текста для индивидуального домашнего задания:

RYE

Rye seems to be rather a new crop as compared with wheat and barley. Specialists consider rye to have been found first as a weed in wheat in central Europe. Then it was separated from the wheat and used as a new crop. It seems to have been cultivated first in western Asia and southern Russia.

Soil requirements of rye are not as exacting (взыскательный) as those of other small grains. It is more productive on infertile, sandy, or acid soils than wheat, oats, or barley. Rye often is the only small-grain crop that can be grown successfully on sandy soils, but it grows best being sown in a well-prepared, firm seedbed.

There exist both winter and spring varieties of rye. However, the latter are less productive than the former and are grown to only a limited extent. Spring rye should be sown at the time spring wheat is seeded, i.e., when the ground can be worked. The time of seeding winter rye will depend on the use to be made of the crop.

The usual depth of seeding is from 1/2 to 2 inches. The depth will vary with the type of soil and season. On sandy soils and in dry seasons the seed should be placed deeper; Better results are usually obtained from seeding with the drill than from broadcasting the seed. The former method is almost universally practiced.

Rye is harvested in the same manner as other small grains.

## **2.2. Устный контроль лексики**

agriculture, crop, to grow, to harvest, farm, land, yield, plant, planting, food, cultivation, practice, cultural practice, variety, to develop, to depend (on), to increase, to improve, quality, to produce, to provide, different, some, the same, either ... or, both ... and, as ... as.

## **3. ОПРОС:**

*Примерное содержание устного высказывания при опросе:*

### **CROP VARIETIES**

Crop production depends on different factors. Many of them cannot be controlled by man, but some of them can.

One of the important factors of high crop production depending on the farmer is selection of the best varieties. The most popular varieties for the area are those which produce high yields of high quality product. These varieties should also be resistant to pest and diseases which are often a problem in many regions.

Information on the most important crops grown in the area may be obtained from regional experiment stations. They inform farm agronomists about yields, quality, disease resistance and other characteristics of different varieties. On the base of such information the agronomists select the varieties for their farms.

But as it is not possible to select ideal varieties, much work is done on their improvement. The aim of such improvement is development of a variety with combination of all the necessary characteristics.

## **Тема 2. «Сельскохозяйственные культуры и окружающая среда»**

### **1. ОПРОС:**

*Примерное содержание устного высказывания при опросе:*

### **CROP PLANTS AND ENVIRONMENT**

The conditions in which an organism lives are known as environment.

All plants require favourable environmental conditions for their better growth and development. Crops that are not well adapted to the region where they are cultivated will not produce high yields.

In crop selection climates the most important environmental factor. The crops which grow best under relatively cool or moderate conditions include wheat, oats, barley, rye, potatoes, sugar beets, red clover, and many grasses. Corn, cotton, sorghum, rice, soybeans do best<sup>2</sup> under warmer conditions.

Crops also differ in the length of the growing season required for the optimum development. A frost-free period less than 125 days is unfavourable for most crops.

Another factor influencing the growth of plants is humidity that is why the average annual rainfall is a very essential characteristic of an area.

Light is necessary for photosynthesis — the process by which plant food is manufactured. Life processes of many plants are influenced by the relative length of day and night. Long-day plants require long days for their better growth, while short-day plants produce flowers and fruit: when the days are short. Most small grains belong to the group of long-day crops, among short-day crops are corn, sorghum, rice, millet, and soybeans. There are also crops which are not affected by the length of day, these are cotton, sunflower, and buckwheat.

Air is an important environmental factor, too. It supplies carbon dioxide for plant growth and oxygen for respiration as well as for chemical and biological processes in the soil.

## **2. ИНДИВИДУАЛЬНОЕ ДОМАШНЕЕ ЗАДАНИЕ:**

**2.1 Устный перевод со словарем (подготовленного текста)**

**2.2 Письменный перевод со словарем (неподготовленного текста)**

*Примерное содержание текста для индивидуального домашнего задания:*

### **PLANTS IN ECOSYSTEM**

Ecosystem is the smallest unit in nature that can live independently. It includes all plants, all animals, and the non-living part of the environment, such as soil and climatic factors of a natural geographic area.

Plant is always part of an ecosystem. Different parts of a natural ecosystem should be always in balance. This natural balance must not be destroyed by man.

The environment is constantly developing, this process is known as evolution. In the process of evolution new plant varieties may be developed.

However, natural evolution is a very long process. Nowadays agriculturists of all countries have their program of plant improvement. Under this program the evolution of crop varieties may not require more than some years.

### **CLASSIFICATION OF FIELD CROPS**

Crops are variously grouped and classified. For example, they may be classified as cultivated or row crops, such as corn, soybeans and cotton; noncultivated crops, such as wheat and barley;

and hay or pasture crops, such as clovers, alfalfa, and many other small-seeded legumes and grasses.

Crops are also grouped according to<sup>2</sup> the duration of their growth. Annual crops are those that complete their life cycle in one season. Biennials start their growth in one season but produce seed and die at the end of the second season. Perennials grow for more than two seasons, producing seed each year.

The most important and most often used classifications are botanical classification and agronomic classification.

**Botanical Classification.** Botanical classification is based upon similarity of plant parts. Most of our field crops belong to one of the two botanical families, the grasses and the legumes.

The main food plants known belong to the grass family, including all cereal crops and about three fourths<sup>3</sup> of the cultivated forage crops. Cereals are the world's leading food and feed crops. They are grain-bearing grasses such as wheat, corn, rye, barley, oats etc. Forage grasses are the ones that are highly essential for the economic production of livestock products.

Almost all grasses have hollow stems made up of nodes and inter-nodes and varying greatly in length in different plants. The roots are fibrous. Grasses may be either annuals or perennials.

The legume family includes such large-seeded legumes as Held beans, field peas, soybeans and such nutritious forage crops as alfalfa and clovers. The plants of this family are the only<sup>6</sup> ones growing in a symbiotic relationship with rhizobia bacteria. Multiplying in the nodules on the roots of the legume crops raised the bacteria are able to fix free atmospheric nitrogen in their bodies and eventually in the plant residues. Plowing under these plant residues, one can increase soil fertility. Being high in protein content the legume crops are also valued as food both for man and farm animals.

Legumes may be annuals, biennials or perennials. The fruit is a pod containing one to several seeds. Legumes have tap roots.

There are some other botanical families that include crop plants widely used by man. Such crops are potatoes, sugar beets, cotton, flax, buckwheat and others.

### **AGRONOMIC CLASSIFICATION OF FIELD CROPS**

Agronomically, field crops are most often grouped according to the way in which they are used. Some of our crop plants have several uses; for example, corn is most often grown as a grain crop, but it is also known as one of the most productive forage crops. Another example is soybeans that are most often produced as an oil crop, but they are also grown as a hay or green manure crop<sup>1</sup>.

The most common agronomic classification divides field crops into the following main groups:

I. Cereals or Grain Crops. A cereal is a grass grown for its edible grain. The most important grain crops widely grown throughout the world are wheat, com, barley, oats, rye, rice, sorghum, and millets. Grain crops are mainly used as bread crops and as concentrates in feeding livestock. They are well adapted to machine harvesting and processing. All of them are annuals, producing seed in the year of sowing.

II. Large-Seeded Legumes. The principal legumes grown for seeds are field peas, field beans and soybeans. The edible legumes are widely grown by man, for they are a very important source of protein. The growing of legumes is very useful for improving soil fertility.

III. Root Crops. Crops known as root crops are cultivated for their enlarged nutritious roots. The most widely grown root crops are vegetable crops used as human food. They are carrots, radishes, beets and others. Unlike cereals, they are biennials. The food collected by them the first year is stored up in their roots and used for producing seeds the second year.

IV. Forage Crops. These are the crops used as feed for animals in a fresh or preserved form. Forage crops including grasses, legumes and some other crops are cultivated and used for hay, pasture and silage. Most forage crops are perennials, that is<sup>2</sup>, they can live and produce seeds for many years in succession.

V. Tuber Crops. The most important tuber crop cultivated throughout the world is potatoes. A tuber is not a root, it is a short thickened underground stem. Like root crops tubers are biennials, but people grow them as annuals.

VI. Fibre crops. As the name shows, these crops are grown for their fibre which is used in making clothes or for different purposes in industry. Almost all fibre crops produce seed containing oil used either as human food or as industrial material. Of the fibre crops cotton, flax and hemp are of greatest importance for man. Some other groups of field crops can be named, such as sugar crops, drug crops, oil crops, etc.

## **2. ИНДИВИДУАЛЬНОЕ ДОМАШНЕЕ ЗАДАНИЕ:**

### **2.1 Устный перевод со словарем (подготовленного текста)**

*Примерное содержание текста для индивидуального домашнего задания:*

#### **№1 Life Cycle**

According to their life cycle plants are classified as annuals, biennials and perennials. The life cycle of a plant includes all the phases of plant growth starting with a seed. Many important crop plants complete their life cycle in one growing season. Such plants are known as annuals.

Some annuals are spring annuals planted in spring and harvested in autumn. There are also winter annuals planted in autumn and harvested next summer. Winter wheat is an example of a winter annual and corn is a typical spring annual. Some plants complete their life cycle in two seasons. During the first season stems and roots are produced. Second-year plants produce flowers, fruit and seed and at the end of the second season they die. Beet is a good example of a biennial plant. People use roots of biennial plants and harvest root crops at the end of the first season. Many plants live for more than two seasons, such plants are known as perennials. They produce seed every year. After seeds have been produced, the plants do not die. They are not active during winter, but in spring they produce new growth. Many of our hay and pasture crops are perennials. The examples of perennial crops are alfalfa and clovers.

#### **№2 LEGUMES FOR PROTEIN AND OIL**

Cereals are the main source of energy in the human diet. But they do not contain much protein. Edible legumes are high in plant protein which is necessary both for man and farm animals.

The main edible legumes grown in the United States include soybeans, field beans and field peas. Soybeans are now one of the leading farm crops in this country. Soybean area has increased and now this crop is economically as important as corn.

The soybean plant is adapted to different soil and climatic conditions. There are many varieties of this crop. Some of them are adapted to northern and some to southern conditions.

Soybeans are mainly grown for forage, grain or as a vegetable. They can also be grown as a green manure crop. As a forage crop soybeans are used for pasture, hay and silage. Soybean grain is highly nutritious and many human foods are produced from it. The protein content of soybean seed varies from 30 to 50 percent and the oil content from 15 to 25 percent. The grain can be processed into oil used either as human food or as industrial material.

The crop for grain should be harvested when seeds are low in moisture, not more than 13 percent. In regions where soybeans are harvested with high moisture content air ventilation should be provided in the storage.

## **Тема 4. «Растение, его части и их функции»**

### **1. ОПРОС**

#### **1.1. Опрос по базовым текстам раздела по аспектам:**

- (1) фонетическое чтение;
- (2) устный перевод со словарем;
- (3) письменный перевод со словарем;
- (4) чтение текста по теме раздела на извлечение информации
- (5) опрос по теме.

### **PLANT, ITS PARTS AND THEIR FUNCTIONS**

Most of the important crop plants are reproduced by seeds, and they are known as seed plants. In the life cycle of these plants the seed germinates and produces a seedling. The vegetative phase is characterized by increases in the number and size of roots, stems and leaves. Finally, having reached the reproductive phase, the plant flowers and produces seeds, thus completing its life cycle.

Sometimes as much as one half, but in certain root crops more than one half of a crop plant is underground. Being in the soil the roots are as important as the tops because nearly all the water and all the mineral nutrients required are absorbed by roots. Having been absorbed from the soil, the nutrients and water are translocated from roots to other plant parts.

In addition to<sup>2</sup> the main function mentioned the root performs two more' functions. It anchors the plant by branching throughout the soil and serves as a storage organ for nutrients in biennial and perennial plants. Due to their having stored up food during the previous year these plants are able to produce new spring growth.

Two general kinds of roots are found in crop plants: fibrous roots and tap roots. The roots of cereals and other grasses belong to the former and those of legumes and root crops — to the latter. Water and nutrients dissolved in it are absorbed through the root hairs found on roots and root branches of both fibrous rooted and tap rooted plants.

The above ground portion of a plant consists of leaves and stems. The leaf plays a highly important role due to its manufacturing carbohydrates through the process known as photosynthesis.

The main functions of the stem are: conducting water and plant nutrients from root to leaf, supporting leaves and storing food materials as in the case of sugarcane and sorghum.

Being young the grasses have solid stems, that is, the ones filled with the pith. Having matured the stems of most grasses become hollow. Some crops as corn, for instance, have stem pith throughout their lives.

A major crop production problem associated with the stem is lodging which is due to the adverse effects of rain and wind. Resistance to lodging, or the capacity of stems to withstand the adverse effect of weather, is an important quality in cereals. Growing lodging resistant varieties is the main controlling measure.

## **CROP BREEDING AND IMPROVEMENT**

Plant breeding is the science of changing and improving the heredity of plants.

In the past the breeders had no scientific knowledge which is available now. The selection of superior types was the most important method of improving crop plants. Variations between plants of the same species were used as the basis for developing new improved varieties.

Now with increased knowledge of genetics and related plant sciences plant breeders are able to influence such plant characteristics as yield, early maturity, drought resistance, winter hardiness, disease resistance, insect resistance and quality.

Plant breeding depends on many sciences, genetics and cytogenetics being the two most important. Other sciences needed by the breeders are plant physiology, plant pathology, entomology, plant biochemistry, agronomy, botany, statistics and computer science. The most successful achievements in plant breeding are due to the combined work of many specialists.

Each crop variety possessing certain desirable and undesirable characteristics, the aim of the plant breeder is the development of a superior variety by eliminating the undesirable qualities and combining the desirable ones in the same variety.

The characteristics desired vary with<sup>1</sup> the crop and the conditions of growing. With wheat, for example, winter hardiness, protein content, milling quality and resistance to lodging are important. In some areas, early-maturing, cold-resistant varieties are needed, while in others later-maturing, drought-resistant varieties will do best, yield and resistance to major diseases and insects being important in all cases.

Three general methods of crop improvement are commonly used. These are introduction, selection and hybridization, the last one being the method of crossing two or more varieties that differ in some inherited characters. These methods are not wholly distinct because hybridization almost always must be preceded or followed or both preceded and followed by some scheme of selection.

Progress in crop breeding can be measured only by experimental tests except when breeding is done for disease resistance, better colour or some other character that can be readily seen. Even then the investigator must know how the new strain compares in yield with the variety replaced. That is why field-plot test<sup>2</sup> should be conducted.

## **A NEW HYBRID**

A new hybrid has been developed by crossing wheat and rye. It is the first man-made cereal named triticale. Its name comes from a combination of the scientific names for wheat, *Triticum*, and rye, *Secale*.

The aims of hybridization between the two crops are increasing protein content of wheat and combining high yields of wheat with drought-resistance of rye.

The first hybrids between wheat and rye were obtained in 1875. But those hybrids were highly sterile and did not reproduce. Triticale as a variety was first produced in Hungary (Венгрия) in 1968. In North America the first variety of triticale was developed in 1970. A few thousand hectares of triticale were grown in the Soviet Union in 1973.

At present there are triticales that can be produced commercially. The crop is classed now as a feed grain. As such it is equivalent to other cereals. But the grain quality is not very good for bread making

Protein content of the hybrid can be 30 percent, compared to 8 or 10 percent in corn and 13-5 percent in rye and wheat. Triticale protein is high in essential amino acids which make the crop very good as feed for livestock.

Plant breeders are now working at developing triticales with shorter stems that will not lodge. Much breeding work should be done in improving the grain quality and increasing the yield.

8. Our industry has produced farm machinery for mechanization of different agricultural processes.
9. New machines for drainage are being produced in many countries.

#### ***2. Укажите номера предложений, в которых действие относится: а) к настоящему моменту, б) к прошлому, в) к будущему.***

1. Many improved crop varieties have been developed in our country.
2. This variety was developed some years ago.
3. Our agronomist is working at a very important problem.
4. Yields are often increased by application of fertilizers.
5. Many years ago higher yields were mostly obtained by cultivation of new agricultural areas.
6. We shall begin a new experiment on our farm next month.
7. Different methods of yield increases are used in agriculture.
8. These areas will be irrigated next week.
9. We do not use drainage in this area.
10. Last spring farmers used more fertilizers than this year.
11. We have greatly raised food production in our area.
12. Intensive methods of crop growing are being developed now.
13. Agriculture supplies people with food products.
14. Crops may be grown by different methods.
15. Not all operations of crop cultivation have been mechanized.
16. There are many problems in agriculture which should be solved.
17. Achievements of biology are used on many farms.
18. New methods of weed control have been used on this farm, and good results have been obtained.

**3. Переведите следующие предложения, содержащие оборот to be + of + существительное .**

1. This method of crop selection is of great interest.
2. Fertilizers are of great value in such areas.
3. The increase in food production is of great importance for all countries.
4. This farm machine is of great use on our farm.

**Контрольная работа №2  
«Особые случаи употребления и перевода пассивного залога»**

***Variant I***

**1. Переведите предложения, обращая внимание на залог сказуемого:**

Our collective farm has been given some new crop varieties.  
The agronomist was asked about the methods of weed control which are used on the farm.  
The biologist will be shown the results of our experiments.  
Many important problems are being solved by agriculturists of different counties.  
Last week our farm was visited by a group of specialists in plant diseases.

**2. Употребите глагол, заключенный в скобки, в соответствующей форме:**

Nowadays crop production (to increase) mostly by the use of improved cultural practices.  
This plant (to grow) well on our farm.  
On this collective farm all crops (to plant) and (to harvest) by farm machines.  
Agriculturists of all counties (to work) much at the development of improved crop varieties.  
High yields (to obtain) last summer.  
Next year more food products (to produce).  
Farms of our area (to raise) the yield of the most important food crops.  
Many new achievements of biology (to use) in agriculture.

**Контрольная работа №3  
«Причастие I и причастие II. Причастие II в постпозиции. Слова-заменители существительного»**

**VARIANT I**

**1. Переведите следующие предложения, содержащие: а) причастие в постпозиции, б) причастные обороты:**

- a) The quality of the grain harvested is high. The quality of the grain depends on the method of harvest used. The yield of all the farm crops grown has increased. They spoke about the yield obtained.
- b) Some of the crops requiring cool conditions for their growth are wheat, rye and potatoes. The growing period required by winter wheat is about 300 days. There are many factors influencing crop growth and development. Plants cultivated by man are known as farm crops. Using fertilizers, farmers increase the fertility of the soil. The cultural practices used in crop cultivation are different in different areas. Crops growing well under warm conditions are short-day crops. Growing improved varieties, we obtain higher yields.

**2. Выделите слова-заменители существительного, переведите предложения:**

The optimum temperature for cotton is higher than that for small grains.  
Some crops do best under warm conditions; these are corn, cotton, rice and some others.  
Cereal crops are known as the most important ones for man.  
Row crops are those that are cultivated during their growth.

This soil is better than that one.  
The growth of corn is more affected by good soil conditions than that of rye.  
One should know the difference between the roots of grasses and those of legumes.  
There are many different cultural practices of crop production, this one is traditional.

#### **Контрольная работа №4**

*«Герундий. Отглагольное существительное. Сложные формы причастия и герундия»*

##### **Variant I**

*В следующих предложениях определите функцию слов с суффиксом –ing:*

a) Applying fertilizers, we may essentially increase the yield. Applying fertilizers to this crop usually produces a good effect. Farmers applying fertilizers to this crop usually obtain good results. Farmers applying proper fertilizers, the yields are usually much higher.

b) Having supplied the soil with organic matter, the collective farm obtained a good yield of small grains. Being adapted to potato growing, these sandy loams will produce tubers of the highest quality. Among the factors influencing crop production climate is the most important one. Preparing the seedbed is one of important operations in crop growing. The method of harvesting used depends on many factors, proper maturity being one of the most important. Planting the seed, we use farm machines in order to make the work easier.

#### **Контрольная работа №5**

*«Независимый причастный оборот»*

##### **Variant I**

*1. Выделите независимый причастный оборот в следующих предложениях.*

*Переведите предложения:*

- a) Corn being a good source of grain and roughage, farmers grow it widely. Winter wheat having been sown in August, its roots can develop well before winter. The soil containing much plant food, the crops will produce high yields.
- b) It is necessary to apply nitrogen into the soil, the amount varying with the crop. Cereals are widely grown for obtaining grain, the latter being mainly used as food for people and feed for livestock. There are many root crops grown by man, the most important being sugar beets, carrots and radishes.

*2. Укажите предложения, содержащие независимый причастный оборот.*

*Переведите предложения:*

Plant breeding being the science of changing the heredity of plants, the scientists widely use it in improving crop plants.

Many plant sciences are used by plant breeders in developing new varieties of crops, genetics and cytogenetics being most important.

Many varieties of corn producing good yields of high quality forage and grain are cultivated throughout our country.

Each plant has two parts, the roots and the above-ground portions, the latter consisting of leaves and stems.

The stem of corn varies greatly in length in different varieties, the usual length being 5 to 10 feet.

Planting machines being used, a smaller amount of seed is required.

### 1. ОПРОС

#### Опрос по базовым текстам раздела

- (1.1) фонетическое чтение;
- (1.2) аналитическое и поисковое чтение;
- (1.3) устный/письменный перевод.

*Примерное содержание текстов для проведения опроса:*

#### **SEEDS AND SEEDING**

Good seed is highly essential to successful crop production. Its purity and germinating power should be known before it is planted.

After threshing seeds usually contain foreign materials such as chaff, dirt, weed seeds and seeds of other plants. These can be removed to a large extent<sup>1</sup> but not entirely by cleaning machinery. The presence of weeds in the seed often increases the labour required for the production of the crop, reduces crop yields and contaminates the product available as well as the seed and soil in future seasons.

Mature seed is preferable to immature seed. Immature seed having a low reserve of food supply because of its small size usually produces poor plants when conditions are adverse at planting time. In addition<sup>2</sup>, immature seeds, high in moisture, are injured by frost.

Most seeds show dormancy, that is, they do not germinate immediately after having become mature even though<sup>3</sup> external conditions favour germination. They must pass through a rest or after-ripening period, the duration of the dormancy varying greatly with different species. One should know the length of the dormancy period of the seed that will be planted. It ranges from a few days to some months or even years. Dormant seeds can survive conditions which would kill them if they were active.

Good stands can be obtained by seeding high-quality seed. However, even the best seed will not produce optimum yields, provided other factors are not proper. A moist, firm and warm seedbed that provides favourable environment for germination is of greatest importance in establishing a vigorous and uniform stand. Unless there is enough moisture in the soil, poor germination will take place.

Two critical factors must be controlled during seeding: depth and rate. Planting at a proper and uniform depth favours quick and uniform germination. The depth of seeding is influenced by the type of the soil and the size of the seed. If fine seed were placed too deeply it would have some difficulty in reaching the surface of the soil. Coarse seeds should be planted much deeper than fine seeds.

The establishment of high-quality stand is also favoured by a proper seeding rate, both underseeding and overseeding reducing potential yield. The former does not allow full utilization of the available moisture, nutrients and light while the latter requires more nutrients than are present in the soil and reduces the yield.

Other agronomic recommendations that should be followed in obtaining a good stand are seeding at optimum time, covering seed properly, using proper weed-control techniques, using proper seeding machines and equipment, and applying proper fertilizers.

#### **КОНТРОЛЬНАЯ РАБОТА:**

##### **Контрольная работа №1**

*«Условные предложения. Повторение грамматики: активный и пассивный залог».*

##### **Variant I**

*1. Переведите предложения, содержащие условные придаточные:*

- a) If we grow legumes, the soil fertility will be higher. Corn will grow better if there is much nitrogen in the soil. If the seed is of high quality, we shall obtain a higher yield.
- b) If we grew legumes, the soil fertility would be higher. Corn would grow better if there were more nitrogen in the soil. If the seed had been of good quality, we should have obtained a higher yield.

**2. Переведите следующие предложения, обращая внимание на союзы *if, unless, provided*:**

Unless there is enough moisture in the soil the seed will not germinate. Provided temperature conditions of the late summer are not favourable, grain will not ripen properly. The seed would germinate earlier, if there were more moisture in the soil. If the rate of seeding were too high, the plants would have not enough water and nutrients for their growth. Poor results may be obtained with this crop unless it is sown in a warm and moist soil. Good strands can be obtained, provided high-quality seeds are used. Provided the soil is not moist enough at planting time, irrigation should be applied. If a seed placed under favourable conditions does not germinate, it is in a dormant state.

**Контрольная работа №2**

**«Условные предложения. Повторение грамматики: Причастие I и причастие II»  
Variant I**

**1. Переведите предложения, содержащие условные придаточные:**

a) 1. If we grow legumes, the soil fertility will be higher. 2. Corn will grow better if there is much nitrogen in the soil. 3. If the seed is of high quality, we shall obtain a higher yield;

b) 1. If we grew legumes, the soil fertility would be higher. 2. Corn would grow better if there were more nitrogen in the soil. 3. If the seed had been of good quality, we should have obtained a higher yield.

**2. Найдите в следующих предложениях причастия и определите их функцию. Переведите предложения:**

a) 1. Using the new method of harvesting, they obtained higher yield of sugar beets. 2. The collective farms using the new method of harvesting obtain higher yield of sugar beets. 3. Our collective farm is harvesting sugar beets now. 4. The growing period of barley is shorter than that of other cereals, this crop producing good yield when it is sown in late May. 5. Rye being drought-resistant, any soil can be used for this crop.

b) 1. Most wheat varieties cultivated produce high yields of good quality grain. 2. Wheat varieties cultivated in our country have been developed by our plant breeders. 3. Two wheat varieties are cultivated on the farm.

c) 1. Having stored up nutrients in the first season, root crops are able to grow and produce seed in the second season. 2. Being anchored by roots, plants can withstand the adverse effects of rain and wind. 3. Having been sown in a well-prepared soil, wheat developed well and produced high-quality seed. 4. All farm crops have certain desirable characteristics, the highest yields being obtained from those best adapted to the conditions of growing. 5. Soil fertility having been increased, the farmer could obtain a higher yield of potatoes.

- (1.4) устный опрос по теме.

*Примерное содержание текстов для опроса:*

## **SOIL**

Being less important than climate, soil properties are essential in determining which crops to grow.

Texture of a soil refers to the size of its particles. Soils range from pure sands to pure clays. The principal textural classes are sand, sandy loam, clay loam, and clay. A soil with a large proportion of clay particles is usually called a heavy soil, and the one with a large proportion of sand — a light soil, the two types differing greatly in the ease of cultivation. Soil structure refers to the manner in which the particles are arranged. An aggregated or compound structure favours good seedbed preparation, ease of cultivation, and protection from wind or water erosion. Aggregated structure normally is found in soils rich in<sup>1</sup> organic matter.

Among soil constituents, water is the most important one. The finer the soil particles, the more water the soil holds. Extremely coarse sandy soils are unable to store moisture in sufficient amounts for crops to grow well.

Air, which makes up from 20 to 25 per cent by volume of an ordinary moist soil, supplies oxygen necessary for root growth and for oxidation of organic matter and other soil constituents.

To grow well crop plants need an adequate supply of plant nutrients during the growing season. About 25 or 30 chemical elements are found in plants, carbon, oxygen and hydrogen being most abundant. The essential mineral elements that are present in plants and are most frequently deficient in soils are nitrogen, phosphorus, and potassium. But in order to grow normally crops also absorb considerable quantities of other minerals, such as calcium, magnesium, and sulfur.

Good soils contain adequate amounts of available nutrients to meet the needs<sup>2</sup> of a crop plant for normal growth. They are not too acid or too alkaline to produce good growth. In general, fertile soils with a good water-holding capacity are favourable for the growth of the most important crop plants. Some soils may have an especially wide range of crop adaptation. However, to apply additional fertilizers is usually a good practice even on the best soils, provided growing conditions are favourable.

## **SOIL WATER**

Soil water is one of the most important factors affecting crop production. The success of a cropping system may sometimes depend on adequate irrigation and drainage programme.

Water must be available in the soil to compensate its losses through some natural processes during the growing season. Soil water is needed as it conducts nutrients for growing crops. It also has a great effect on aeration and temperature conditions in the soil. The soil must be able to provide water for maximum yield to be obtained.

However, the moisture content of a soil is not always optimum for the highest crop production. Usually there is either a deficiency or a too big amount of it, and crop production is reduced.

Some soils contain too much water at all times, and to be used for agriculture they require special drainage. There are soils which are always deficient in moisture because of inadequate rainfall, and will produce poor crops unless they are irrigated. Most agricultural soils have enough water to meet plant requirements during a considerable part of the year.

Soil water is also a very essential factor in cultivation. It often determines the time and the depth of sowing. If there is too much water, the use of machine cultivation and harvesting machinery may be not possible. Insufficient amount of moisture makes the soil too hard and very difficult to cultivate.

## КОНТРОЛЬНАЯ РАБОТА

### Контрольная работа №1: « Повторение грамматики: Инфинитив».

#### 1. *Переведите, обращая внимание на функцию инфинитива в предложении:*

1. To find the optimum system of crop rotation will be of the greatest importance for increasing crop production.
2. The system of crop rotation to be used depends on different agronomic factors.
3. To find the optimum system of crop rotation one should know the agronomic and economic situation on the farm.
4. The system of crop rotation we have chosen is likely to produce good results.
5. This system of crop rotation is considered to be suitable for soil and climate conditions of the area.
6. In order to obtain good results with this system of crop rotation we must also apply proper fertilizers.
7. The system of crop rotation chosen has been found to be the best for our region.
8. This system of crop rotation combined with the proper fertilization system is sure to produce good results.

### Контрольная работа №2: « Повторение грамматики: Инфинитив».

#### *Переведите следующие предложения, обращая внимание на функцию инфинитива:*

1. Hot, dry winds increase water losses and in some areas are reported to reduce the yields of corn considerably.
2. It is advisable to sow cool-weather grasses in early fall, but early spring seeding is preferable on extremely heavy soils.
3. Soil moisture deficiency at the time of tuber formation of early potatoes has been found to seriously retard this process.
4. Liming materials are used to bring about chemical, physical and biological changes in the soil that are so beneficial to plant growth.
5. Nitrogen application in autumn does not seem to be required for winter wheat, provided sufficient application of this element was made in spring as a top dressing.
6. We know the physical properties of the soil, which is either too heavy or too light, to be improved by an increase of the humus content.
7. One of the aims of pasture maintenance is to keep a good balance between grasses and clovers.
8. There are many rotations to be followed in corn production, the best rotation being the one, that provides the abundance of organic matter.
9. Special drills are likely to have been used in establishing this new pasture.
10. For a pasture mixture to give the highest yields, its components must be well adapted to soil and climatic conditions of a given region.
11. Seedbed for pasture plants should be sufficiently firm to obtain a uniform, shallow covering of the seed.

## CULTURAL PRACTICES

There are many ways in which the yield can be affected by management of a crop.

No crop will grow well unless it gets a good start in a suitable seedbed. The seedbed must be either fine or coarse, it must have fine soil at the depth where the seed is to be sown, and it should be moist. Different crops require different seedbed.

Sowing a crop must be done properly. The seed is to be drilled in at the right depth, depending on the size of the seed and the season. Generally the smaller the seed the closer it has to be sown to the surface. The time of sowing the crop depends on the length of the growing season and of the variety chosen, as well as on the moisture conditions. The sowing rate must be lower in dry areas with no rain for long periods. In such areas plants compete strongly for soil water, and irrigation should be done to obtain higher yields. The soil being rich nutrients, the rate of sowing may be increased. This factor is of great importance, for too thick or too thin sowing will lower grain production.

Proper cultivation of a crop is often essential if the highest yield is to be obtained, and the main reason of cultivation is to kill weeds when they are young.

To harvest a crop at a proper time is also one of the conditions greatly affecting the crop production. However, before fixing the time for harvesting we should know, whether the crop is to be used for hay or for silage. Crops to be harvested for silage must be cut when they are bulky and still succulent. Crops used for hay are usually cut before they set seed. As to grain crops, they should not be harvested until the grain is mature, and hot dry weather is usually the best for grain harvests.

Mechanical harvesting helps the farmers to harvest field crops while they are in peak condition, more timely harvest reducing the risk of bad weather causing a loss in quantity and quality. For modern harvesting equipment to be of greater effect, crop varieties better adapted to mechanical harvesting have been developed. They are more uniform in height and ripen more evenly. Also crops with shorter growing season are being developed. Some grain varieties do not shatter easily as they are cut with modern harvesters.

The problem of choosing proper soil management practices is highly essential-as it not only affects the yield, but also maintains high fertility level, prevents soil erosion, and improves soil structure.

## **2. КОНТРОЛЬНАЯ РАБОТА**

### **Variant I**

#### **1. Назовите номера предложений, где пропущено союзное слово «который»:**

The optimum temperature the seed will germinate at varies with different kinds of seeds.

The farm our agronomist spoke about is a good producer of forage crops.

Cereals that are widely grown in this region are used as food both for man and for livestock.

To obtain good stands plant growers should follow the recommendations which are given by the agronomist.

The crops farmers grow for plowing under are called green manure crops.

We use fertilizers and barnyard manure to supply nutrients the plants have removed.

#### **2. Переведите предложения, восстанавливая при переводе опущенное союзное слово:**

The fertilizers we have applied will increase crop yields.

The seedbed the farmers use for planting must be well prepared.

The principal parts a plant consists of are the roots, the stem and the leaves.

The classification of grain crops we discussed last week is of great interest.

## **3. ИНДИВИДУАЛЬНОЕ ДОМАШНЕЕ ЗАДАНИЕ:**

### **3.1 Устный перевод со словарем (подготовленного текста)**

Примерное содержание текстов для индивидуального домашнего задания:

## **DRAINAGE AND IRRIGATION**

One way of drainage is the natural property of the soil to allow water to pass deeply into the ground. The ease with which water can pass through a soil is influenced by soil texture. The coarser the particles, the more rapidly the water passes through the soil. So, light sandy soils are more water permeable than heavy clays.

Another way is artificial (искусственное) drainage, that is the removal of water which is not needed in order to maintain correct balance of air and water in the soil. Good drainage makes a soil easier to cultivate and increases the feeding area for plant roots. A well drained soil will also have enough air for aerobic bacteria to decompose organic matter into humus and so to provide food for the plant.

Where and when the supply of water is insufficient, irrigation is needed. There are two main sources of irrigation water: surface water and ground water. The former may be obtained from different rivers (реки) and other water reservoirs, while the latter is provided by the underground water stores.

The amount of water required for irrigation depends on a number of factors. These are the type of soil, the water deficit in the soil, the type of crop and its phase of growth. The irrigation requirement of a crop is not the same throughout its growing period, most plants requiring larger quantities of water during the later periods of growth.

## **FERTILIZERS AND THEIR APPLICATION**

As crops are known to remove nutrients from the soil, the latter may become deficient in some elements. Application of commercial fertilizers is to improve soil fertility and to ensure better quality of the crops to be grown.

Fertilizers are usually classified according to the food element which forms their main constituent. So, they may be grouped as nitrogenous fertilizers, phosphoric fertilizers, potassic fertilizers and so on.

To be effective, fertilizers should be applied where and when the plant needs them. Single yearly applications were found to be insufficient for some crops, being unnecessary for others. Young growing plants should not be given concentrated, highly soluble fertilizers because of salt injury. To make repeated applications throughout the season is of great use in case of perennials or long-season annuals.

There are various methods of fertilization. Broadcast application means spreading the material uniformly over the soil surface, usually before the crop is planted. Sometimes the fertilizer is placed directly over the growing crop, which is known as top dressing. When plants are subject to injury fertilizers can be put alongside the plants as a side-dressing, the latter being often made along with cultivation.

Sometimes a mixed fertilizer containing two or more fertilizer elements is to be applied, the time of placement being highly essential. Mixtures with low amount of nitrogen are usually applied to the soil before or during planting, followed by a top dressing or side-dressing with a liquid or granulated nitrogen fertilizer. Winter cereals usually receive a top dressing in spring. Row crops, such as corn, receive a side dressing after the plants made some growth. With many crops nitrogen is applied several times during the growing season because it is known to be subject to leaching and conversion to unavailable forms. But one should not forget that too much nitrogen tends to cause lodging, late maturity, poor seed development in some crops, and greater susceptibility to certain diseases. Phosphatic fertilizers are considered to be most effective when they are applied before the crop is sown, so that they can be worked into the soil and be evenly distributed by plowing. Lime used to correct soil acidity can be applied at any time of the year and to a crop at any stage of growth.

*Примерное содержание текстов для чтения и перевода:*

### CEREAL OR GRAIN CROPS

Cereals are those members of the grass family which have edible starchy seeds. Everybody knows wheat, barley, rye, oats, maize (known as corn in America), rice, sorghum and millets to be most common cereals. They are all spring or winter annuals, that is, they complete their life cycle in a single growing season. The temperate zone cereals or cool-season species known as small grains (wheat, barley, oats, and rye) are to be planted in the fall or spring and harvested in mid-to-late summer. The rest<sup>1</sup> of the cereals belong to warm-season species sown in late spring or early summer and harvested in the fall. The main aim in growing cereals is to produce grain to be used either as human food or as feed for livestock.

Of the cereals raised wheat, rice and corn are the world's three major grain crops, all being about equally important in terms of world production. Although rice seems to constitute the main food of more people, wheat is the first in importance on a world scale of all the cereals as to both the total area sown and the annual production. It is the principle source of carbohydrates for human nutrition.

There is a number of reasons why cereals are the man's leading food source. We know cereals to be annuals, that is why they produce food in a relatively short period of time. In addition, they are adapted well to a variety of<sup>4</sup> soils, climates and cropping systems. Because cereals require relatively little labour, large areas of land can be cropped, and the return in terms of food per unit of labour is high.

General cultural practices required in growing grain crops are quite similar. It is known that they do best on moderately fine but not pulverized seedbeds containing a proper amount of moisture near the soil surface. The seeding depth has been found to vary from 1 to 3 inches. The farmer cannot expect cereals to grow well if they have been sown too shallow because in this case the plants will be poorly supplied with water due to its evaporation from the soil surface.

A problem common to all cereals is lodging resulting from excessively high rates of nitrogen and heavy seeding rates which may produce tall, weak-stemmed plants<sup>6</sup> that fall to the ground. The aim of plant breeders is to develop dwarf stiff-strawed<sup>7</sup> varieties that will not lodge.

Though cereals do not supply enough protein and vitamins necessary for a balanced diet, they are sure to remain a major source of food for people throughout the world.

#### **3.1 Устный перевод со словарем (подготовленного текста)**

Примерное содержание текстов для индивидуального домашнего задания:

#### **BREAK CROPS**

The acreage of cereals may sometimes be increased considerably by growing these crops one after another on the same area. It is not uncommon to find four, five or even more successive or following one after another cereal crops in a rotation. If cereal crops are grown on the same land for many years in succession, such practice is known as continuous cereal growing. In the past this practice often resulted in low yields due to weeds and diseases. Today there is better control of these by chemicals such as fungicides and herbicides and thus farmers have the possibility of growing cereal crops for longer periods of time.

In practice, it is common to grow wheat for two or three years, barley for longer period and then to break (нарушить) the sequence with a crop which is called a break crop. The aim of a break crop is to prevent diseases from increasing.

The farmers usually grow those break crops which are as profitable (выгодный) to grow as cereal crops.

The break crop to be grown varies with the soil and climate, farming and rotation systems and other factors.

#### **WEEDS**

A weed may be defined as a plant growing where it is not wanted. It means that any plant including a crop plant may be classified as a weed in certain situations. Most people, however, do not consider crop plants to be weeds, regardless of where they are found growing. To most of them a weed is a troublesome, wild plant that has invaded their fields. Whether crop plants should be called weeds would depend largely on how objectionable they actually are. For example, barley growing in a field of oats that is to be used as feed for livestock could hardly be considered a weed because it is not objectionable under such conditions. On the contrary, if the

same field of oats is being grown for seed, the mixture would be undesirable because considerable time and labour would be required in removing the barley seed. In this case barley would undoubtedly be considered a weed.

Weeds in field crops are objectionable and harmful for a variety of reasons. They reduce the yields of crops as well as their quality. There are weeds which are known to be poisonous both to livestock and man. One should also remember that some weed species serve as host plants for certain insects and diseases that attack crops. They may thus act as sources of infection for farm crops.

The adverse effect of weeds on crop production is mainly associated with the decreased economic return from the land. Estimates show that weeds are responsible for an overall reduction of somewhat more than 10 percent in the yield of the major world crops, representing huge annual loss of good supplies. Much of this loss occurs because weeds deprive the crop of water, mineral nutrients and light which would otherwise be available and so prevent it from producing high yields.

The extent to which yields may be reduced as a result of competition caused by weeds varies greatly. It depends on the competitive ability of the crop grown, on the type of weeds present, on the degree of infestation and on the season the crop is sown or planted at.

### *Примерное содержание текстов для дополнительного чтения:*

#### **TILLAGE**

After seedbed preparation and the planting of the crop, the young plants start to grow in a few days. When row crops such as corn, soybeans, and cotton are grown, farmers have to cultivate to control weeds. Cultivation includes some tillage operations. One of the purposes of tillage is to maintain good soil tilth that is the physical condition of the soil providing normal plant growth. A soil with a good tilth will be mellow, friable and easily worked.

These conditions are necessary for the roots to absorb nutrients, water and air needed for plant development.

Tillage at the due time and with the proper machines will produce desirable soil tilth. However, too much tillage in preparing the seedbed or cultivating crops may be undesirable.

Nowadays the traditional tillage practice is increasingly replaced by minimum tillage, its main advantages being better soil protection from erosion and lower soil compaction. Under minimum tillage the crop yield is usually as good as under traditional cultivation, while the number of operations is reduced. Farm equipment used now can prepare the soil, apply fertilizers, and plant the seed in one operation.

Vegetable and small fruits can sometimes be grown with no tillage after planting the crop, weeds being controlled with herbicides. Yields of potatoes, carrots and some other crops grown under such system are sometimes even higher than yields when cultivation is practiced.

#### **WHEAT**

Wheat is best adapted to fertile medium or heavy textured soils that are well drained. Silt and clay loams generally produce the highest wheat yields, but it does not mean, that wheat cannot be grown successfully on either clay soils or fine sandy loams.

Wheat grows best when it is sown in a well-prepared, firm, mellow seedbed that is relatively free of weeds, Sufficient moisture should be present to insure prompt germination and a good growth of the young plants. The time and method of seedbed preparation is determined largely by the prevailing moisture conditions, the crop that wheat follows in the rotation and whether wheat is to be sown in spring or fall. Early plowing is an essential factor in securing more grain per hectare. An early prepared soil is known to conserve moisture much better than the one prepared late.

We know a relatively, shallow seeding of 1 to 1.5 inches to produce good stands in areas and in years when sufficient moisture is available at seeding time. Seed sown in dry soil should be drilled from 2 to 3 inches deep.

The rate of seeding wheat is considered to be a very complicated problem. One must take into consideration\* climate and soil conditions, the time of seeding wheat, the quality and germinating power of seed to be sown, the method of sowing to be applied, etc. The seeding rate both for win-tar and spring varieties ranges from 3 to 10 pecks per acre, depending on the factors mentioned above. In general, the lower the rainfall, the lower will be the optimum rate of seeding.

Most of the wheat grown is sown with a drill. Broad-cast seeding, the oldest and simplest method, is used in regions where modern practices have not been introduced. Sowing with a drill is believed to have important advantages over the broadcast method. The rate and depth of sowing and the distribution of the seed are more accurate and uniform, and less seed is required. Better stands, more uniform maturity and higher yields are thus obtained. The modern drill sows seeds in rows at the required rate and depth and also covers them.

Practically all wheat grown is harvested by means of combining.- In general, wheat is probably better adapted to direct combining than any of the other small grains. It is highly important to harvest wheat at the time that will insure the greatest yield of high quality. Wheat is considered to be ready for combine harvesting when the moisture content of the grain is 14 per cent or less.

## **Тема 13. Подготовка к итоговой контрольной работе. Итоговая контрольная работа**

### **КОНТРОЛЬНАЯ РАБОТА**

#### ***I. Переведите следующие предложения, обращая внимание на пройденные грамматические и лексические структуры:***

1. The yield of potatoes is known to be influenced by the quality of the tubers to be used for planting.
2. It is recommended that potato tops should be eliminated either chemically or mechanically in order to facilitate digging.
3. Corn is believed to have come under cultivation somewhat later than wheat or barley.
4. The macro elements such as nitrogen, phosphorus, and potassium are more likely to limit corn yields than other nutrients.
5. It is by crossing crops that many new superior small grain varieties have been produced in recent years.
6. For the protein content of the wheat grain to be increased the soil should be supplied with available nitrogen.
7. For direct the moisture content of the wheat grain should be 14 percent or less for safe storage unless artificial drying is used.
8. The soil being low in organic matter, the growing of crops to be plowed under may be desirable.
9. As to the major small grains, losses due to delayed harvest are least likely to occur with wheat, the latter being the most suitable for combine harvesting.
10. These crops do not seem to have exhausted the soil, because of the proper rotation having been used.
11. Provided climatic conditions are favourable, wheat grown in the soil that is low in available nitrogen will be soft and starchy, while that which is well provided with this element will be hard and high in protein content.
12. The later the weeds appear the less effect they have on the crop growth.
13. The fact that certain weed seeds may remain dormant in the soil for 25 to 50 years before germinating is of great interest.
14. It is warm-season crops that are favoured by the mild climatic conditions of the area.

#### ***II. Подберите словарные определения к следующим словам и сочетаниям слов:***

weed control, species, ecology, rotation, forage crops, humus, leaching, cover crop, erosion

1. The science that deals with the study of the relationships of organisms among each other and to their environment.
2. The well-decomposed, more or less stable part of the organic matter of the soil.
3. The process of killing undesirable plants for economic or other reasons.
4. Removal of nutrient materials in solution from the soil.
5. A group of individuals that are similar in structure and physiology and are capable of interbreeding and producing offspring (потомство).

6. A soil-protecting crop planted and left on the land to prevent leaching and erosion by wind or water.
7. Plants consumed by animals fresh or harvested for silage or hay.
8. Growing crops on a given area of land in such order and succession as to keep the soil in a high state of productivity.
9. The carrying away of the soil surface by running water or wind.

**Контрольная работа: «Повторение грамматики: Сложноподчиненные предложения».**

### **Variant I**

**1. Определите значение слова “as” в следующих предложениях. Переведите предложения:**

As root crops are high in sugar and low in protein they do not supply a balanced diet.

As plants grow they require more nutrients and water.

In order to grow normally crops should absorb such minerals as calcium, magnesium and sulphur.

We have to apply much manure as this soil is too low in organic matter.

The nature of the soil changes as the proportion of clay particles increases.

**2. Укажите в каждом предложении союз (или союзное слово), вводное придаточное предложение; переведите предложения:**

When the soil is known to be low in organic matter, the growing of green manure crops may be desirable.

Until the plant food becomes available plants cannot use it.

Whether corn is grown for grain or for silage, the soil should be fertile enough for plants to develop well.

Rye belongs to drought-resistant plants, which is due to its well-developed root system.

Winter grains grow well and withstand winterkilling, provided they are sown at optimum time.

Air which constitutes from 20 to 25 percent of a normally moist soil supplies the necessary amount of oxygen.

Though beets will withstand light frosts, it is usually best to delay seeding until the last killing frost date is past.

In our region corn is grown principally for grain while its tops are used as livestock feed.

Since corn is a warm-weather plant it is planted as soon as soil temperature becomes high enough.

The Isis

**20. What is the third oldest university in the UK (after Oxford and Cambridge)?**

The University of St Andrews (which is also the oldest in Scotland) founded in 1413

**21. What is the New Zealand's capital Wellington famous for in terms of weather?**

It's the world's windiest city

**22. What is the youngest state in the US?**

Hawaii

**23. What is the title of the head of a university in Britain?**

The chancellor

УК-5- Способен воспринимать межкультурное разнообразие общества в социально-историческом, этическом и философском контекстах

**Задания закрытого типа**

*Выберите правильный вариант ответа*

**1. Укажите предложение, действие в котором относится к прошлому:**

They will build another house at the end of the street.

She is reading a book about electricity.

+ He decided to start a business of his own.

**2. Укажите предложение, действие в котором относится к будущему:**

+ She will phone you as soon as she returns home.

The meeting went as usual.

Night insects are bothering the campers.

**3. Укажите предложение, действие в котором относится к настоящему:**

+They are developing a strategy to achieve their goals.

You didn't do the task properly.

This team will surely win the tournament.

**4. Укажите, в каком предложении глагол стоит в Present Perfect:**

The never understand the importance of planning.

There are too few benches in the park.

+ He has finished the assignment just in time.

**Задания открытого типа**

*Дайте развернутый ответ на вопрос*

**1. What is your name? (Как Вас зовут?)**

*Правильный ответ:* My name is ...

**2. Where do you come from? (Откуда Вы приехали?)**

*Правильный ответ:* I was born in ...

**3. What do you look like? (Как вы выглядите?)**

*Правильный ответ:* I am a tall handsome guy with broad shoulders.

**4. Which school did you graduate from? (Какую школу вы закончили?)**

*Правильный ответ:* The one and only school in our town.

**5. What are your parents' professions? (Кто Ваши родители по профессии?)**

*Правильный ответ:* My mother was a writer, my father was a lawyer.

**6. Where are you studying? (Где Вы учитесь?)**

*Правильный ответ:* At Kostoma State Agricultural Academy if I'm not mistaken.

**7. What kind of person are you? (Что вы за человек?)**

*Правильный ответ:* I am very friendly but sometimes I feel I'm going to snap.

**8. What are your hobbies and interests? (Чем Вы интересуетесь?)**

*Правильный ответ:* My passion is Australia – I'm dreaming to visit it some day.

**9. How do you spend your free time? (Как Вы проводите свободное время?)**

*Правильный ответ:* Unfortunately I don't have much free time these days.

**10. What books do you read? (Какие книги Вы читаете?)**

*Правильный ответ:* I am a big fan of classical Russian literature.

**11. What films do you watch? (Какие фильмы Вы смотрите?)**

*Правильный ответ:* Only the best ones.

Окончательные результаты обучения (формирования компетенций) определяются посредством перевода баллов, набранных студентом в процессе освоения дисциплины, в оценки:

– базовый уровень сформированности компетенции считается достигнутым, если результат обучения соответствует оценке «удовлетворительно» (50-64 рейтинговых баллов);

– повышенный уровень сформированности компетенции считается достигнутым, если результат обучения соответствует оценкам «хорошо» (65-85 рейтинговых баллов) и «отлично» (86-100 рейтинговых баллов).

#### 4 ПОРЯДОК ПРОВЕДЕНИЯ ПОВТОРНОЙ ПРОМЕЖУТОЧНОЙ АТТЕСТАЦИИ

Форма промежуточной аттестации по дисциплине экзамен/экзамен.

Фонд оценочных средств для проведения повторной промежуточной аттестации формируется из числа оценочных средств по темам, которые не освоены студентом.

*Примечание:*

Дополнительные контрольные испытания проводятся для студентов, набравших менее **50 баллов** (в соответствии с «Положением о модульно-рейтинговой системе»).

**Форма промежуточной аттестации по дисциплине зачет.**

**Таблица 4 – Критерии оценки сформированности компетенций**

Код и наименование индикатора достижения компетенции (части компетенции)	Критерии оценивания сформированности компетенции (части компетенции)
	соответствует оценке «зачтено» 50-100% от максимального балла
ИД-1 <sub>УК-4</sub> Выбирает на государственном и иностранном (-ых) языках коммуникативно приемлемые стиль общения, вербальные и невербальные средства взаимодействия с партнерами. ИД-5 <sub>УК-4</sub> Демонстрирует умение выполнять перевод текстов бытовой сферы общения с иностранного (-ых) на государственный язык и обратно	владеет теоретическим материалом по дисциплине «Иностранный язык», но испытывает затруднения в выборе коммуникативно приемлемого стиля общения, вербальных и невербальных средств взаимодействия с партнерами, допускает ошибки в построении устной и письменной речи; студент понимает основное содержание текстов на иностранном языке, демонстрирует удовлетворительные навыки перевода текстов с иностранного на государственный язык и обратно.
